RE: Extricom Ltd.

FCC ID: VDJ-EXRP-40 and VDJ-EXRP-20

I have a few comments on this Application. Depending on your responses, kindly understand there may be additional comments.

1.) Please refer to Form 731. Who will be the technical and/or non-technical contact for this filing? Kindly provide this information.
2.) The application form and confidentiality letters are signed by Eran Shpak. But the FCC contact window is listed as Erez Aharon. The FCC will only recognize Erez Aharon as the correct contact "window" for Extricom, Ltd. Under who's authority does Eran Shpak speak for Extricom?
3.) Since the FCC IDs will refer to the entire product, we will need copies of the relevant RF construction details for this device. Please provide a Block Diagram and a Schematic for the RF portion of this device.
4.) FYI: For the future, please provide a table of data rate vs. RF power for all applicable data rates for low, mid and highest channel. You have identified the slower bit rate channels as producing the highest power, which is expected. However, it is advisable to now provide more specific details on what data rates correspond to what RF power output.

William H. Graff
President and Director of Engineering

The items indicated above must be submitted before processing can continue on the above referenced application.   Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
